2. The modified units apparently have incorporated all  
of the required changes proposed in meetings held in the latter  
part of 1963. (See Attachment "A").

3. [ ] representative, stated that  
4 modified units are scheduled for installation [ ] on  
24 April 1964. I assume 2 units will be installed in A-12's,  
the remaining two in KC-135 tankers. It would seem most profit-  
able, from a testing standpoint, if at least one unit is in-  
stalled in one of the Detachment A-12's, where more emphasis  
would be placed in evaluating its performance.

4. In separate discussions with [ ]  
Plans, the discrepancies noted on MPX-5 critique were discussed  
and resolved. It is suggested that future critiques that con-  
tain any significant recommendations be conducted via meetings  
rather than correspondence.
